Cody Burt

Software Engineer / Course Hero

Redwood City, CA / Aug 2017 - Present

- Architected and built a chargeback management system that stores chargeback case information as it comes in from our payment processor. I also built an internal webpage for our customer support agents to process chargebacks and send responses automatically generated with users' activity on our site.
- Replaced our website's refund infrastructure as part of a migration to a new payment processor with one that could handle refunds through both processors as we switched over
- Contributed to designing and building a microservice to process payments and handle communication between our monolith and payment processor, Braintree

Student Instructor for CS 498R: Problem Solving and Competitive Programming / Brigham Young University

Provo, UT / Aug 2016 - Dec 2016

- Pitched class proposal to CS undergraduate committee
- Created syllabus, lesson plans, quizzes, labs, and exams--all taught in Python
- Taught lectures to students, graded assignments, and handled all typical duties of a normal professor
